

IN THE CLAIMS:

Please cancel claims 21-39, amend claim 40, and add new claims 41-42 as follows.

1-39. (Canceled).

40. (Currently Amended) A collapsible structure comprising:
a coiled wire supporting a covering which is attached to the wire to define [[an interior tunnel-like]] a cylindrical passageway, the coiled loop and the covering having a first end and a second end;
a wall provided at the first end, with a top opening provided in the wall; [[and]]
a helical track provided about the exterior of the covering [[and communicating]];
and
a tube connecting the helical track with the top opening.

41. (New) The structure of claim 40, wherein the helical track comprises a piece of fabric that is bordered by a flexible wire.

42. (New) The structure of claim 40, wherein the helical track extends from the first end to the second end.
